GARDENA

Submersible Pump for Pond Filter or Stream

FSP 5500 / FSP 10000 / FSP 15000

Welcome to GARDENA aquamotion ...

Please read these operating instructions carefully and observe the notes given.

Use the instructions to familiarise yourself with the equipment, the operating controls, their correct use, and the notes on safety.

⚠ For safety reasons, children under 16 as well as persons not familiar with these operating instructions should not use this pump.

Keep these operating instructions in a safe place.

The Applications Range of Your Pump

Intended purpose

GARDENA Submersible Pumps for Pond Filter or Stream have been designed for private use. They are not designed for operating watering tools and systems. The pumps may be used indoors as well as outdoors.

Attention

⚠ GARDENA Submersible Pumps for Pond Filter or Stream have not been designed for constant use in the industrial sector. Corrosive, easily combustible, aggressive or explosive substances (e.g. petrol, petroleum, nitro thinner) as well as salt-water or food / drinking water must not be pumped.

⚠ For Your Safety

Operating the Pump

The pump should be operated via a residual current device with a residual current rating of ≤ 30 mA (DIN VDE 0100-702 and 0100-738). The pump must be placed on solid, even ground. Please ask your electrician for his advice.

Mains power cables

Mains power cables should not have a smaller cross-section than a rubber sheathed cable of the designation H07 RNF. Extension cables must meet the requirements of DIN VDE 0620.

For Austria

In Austria power cables should correspond to ÖVE-EM 42, T 2 (2000)/1979 § 22 according to § 2022.1. According to this standard pumps used in swimming pools and ponds should only be operated via an isolating transformer. Please contact your electrician.

For Switzerland

In Switzerland mobile appliances which are used outdoors, must be connected via a residual-current device.

Visual check

Before operating the pump, look to see if there is any damage of the pump (esp. regarding power cable and plug). A damaged pump must not be used. In case of damage, please have the

Check line voltage

pump checked by our GARDENA Service Centre or by an authorised electrician.

Do not operate pump when there are people in the water

Check line voltage. Data indicated on the type plate must match technical data of the mains supply.

The pump must not be operated when there are people in the water.

Swimming pools and garden ponds

Swimming pools and garden ponds should be designed according to international and national design regulations. Please consult a professional electrician.

Do not use power cable to carry the pump

Do not use the power cable to carry the pump or to pull the plug out of the socket. Protect the power cable from heat, oil and sharp edges.

Disconnect plug

Please unplug the pump after operation and before carrying out any maintenance works.

Temperature of the liquid used

The temperature of the liquid used must not be below 4 °C or above 35 °C.

Wear and reduced output

Sand and other abrasive substances in the liquid cause increased wear and reduce the output of the pump.

Observe local noise prevention regulations

Please observe the local noise prevention regulations.

Operation

The universal fitting provides you with various possibilities to fit a hose:

→ Connection via graduated nipple of

- 25 mm (1")- or
- 32 mm (5/4")- or
- 38 mm (1 1/2")-hoses

→ Connection via GARDENA Water hose-Plug-in-system fittings of

- 13 mm (1/2")- or
- 16 mm (5/8")- or
- 19 mm (3/4")-hoses

Recommendation :

Fix 38 mm (1 1/2")-, 32 mm (5/4")- and 25 mm (1")-hoses additionally with a hose clip.

Cut off the parts of the universal fitting that you do not need with a saw.

**Fitting the universal connector**

1. Push the sleeve nut over the universal connector.
2. Place the sealing ring in the sleeve nut.
3. Screw the universal adapter and sleeve nut onto the pressure joints of the pump.

Positioning the pump

Position the pump on a firm base so that it is at least 20 cm immersed in water.

Pay attention to minimum water depth

Please note the maximum submersion depth (see "Technical Data").

Starting the pump

Connect the power cable to a 230 V AC socket.

⚠ Caution! Pump will start running immediately!

Avoid dry operation

Avoid dry operation of the pump as dry running will produce undesirable heat and destroy the pump.

System Extensions – Product Recommendations

Operating an external filter

To clean your pond you can connect an external filter such as the

GARDENA Pond Filter Art. No. 7904

GARDENA Pond Filter with UVC-light Art. No. 7905

For this purpose use a hose in order to connect the Pump for Filters and Streams with the external filter.

⚠ Please observe the information on safety in the relevant operating instructions!

**Operating a stream**

The pump has been designed for streams and waterfalls:

● Large streams and waterfalls

→ Connect a 38 mm (1 1/2") GARDENA Pond Hose, Art. No. 7898, and run it to the source of your stream.

● Smaller streams

→ Connect hoses with a smaller diameter correspondingly e.g.:
32 mm (5/4")-GARDENA Pond Hose, Art. No. 7897
25 mm (1")-GARDENA Pond Hose, Art. No. 7896.

Care Instructions

Cleaning the pump

If you use your pump frequently in dirty water you should clean your pump as follows:

1. Remove the mains plug.
2. Take the pump out of the water.
3. Rinse the housing of the pump thoroughly with water.
If necessary, also direct the water into the pressure outlet.
4. Put the pump back into your pond or stream.

Information: Do not use any hard objects or strong detergents!

Storage

Where to store

⚠ The pump should be stored out of the reach of children.

1. Take the pump out of the water and store away from frost before the first frost sets in.
2. Clean and check the pump carefully.
3. Store the pump in a container filled with water.
The mains plug must not be submerged.

Information

Complaints/Repairs

If you have any problems with your pump, please contact our Service or return the defective unit together with a short description of the problem postage paid to one of the GARDENA Service Centres listed on the back of these operating instructions.

Product liability

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

Guarantee

GARDENA guarantees this product for 3 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the require-

ments of the operating instructions.

- Neither the purchaser nor a non-authorised third party have attempted to repair the unit.

The feed impeller is a wearing part and is not covered by the warranty.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

In the event of a fault, please send the defective unit together with the receipt and a description of the fault, postage paid, to one of the GARDENA Service Centres on the back of this page.
